

High Frequency Moisture Meter

High frequency moisture meter used for fast and accurate measurement of moisture content in the plastic resin, silica gel, latex, plastic filler, plastic masterbatch, nylon, plastic particles, PVC, ABS, PA, POM, PC, PET, PBT, PPO, PPS, PEEL and PES resins.

**Features:**

- High frequency principle with electromagnetic scanning
- Instant measuring, digital display
- 10 groups of raw material species selected

Specification:

Model	JK-100
Moisture measuring range	0 ~ 100%
Resolution	0.1%

ECO INSTRUMENT (NS0081046-M)

Sampling time	1 second
Accuracy	0.2(1+n)%
Detect area	50mm
Probe length	180 or 300mm
Probe Diameter	6mm
Power	9V 6F22 Battery
Dimension of meter	85 x 27 x 200mm
Standard Delivery	Main Unit with Probe Battery Cases User's Manual
