

Package Drop Test Machine (Monoplane)

EI-PD60SA Packaging Drop Test Machine (Monoplane) used to test the damage degree of the product packages when they free fall to the impact surface, including the corner, angle and face of the container packages, it mainly used to assess products ability to stand the falling during transportation and loading and unloading. The test results can use as the reference for improvement and perfecting packaging design.

Applicable to various factories and enterprises, and technical supervision authorities, institutions, research institutes and universities department specially research and testing equipment.

Standard accordance to ISO 2248, JIS Z0202, GB/T 4857

Specification:

Model	EI-PD60SA
Testing Height	300 ~ 1500mm
Driven	Motor Control
Maximum Load of Specimen	≤60kg
Maximum Size Specimen	1000 x 800 x 1000mm
Impact Base	1700 x 1200mm
Height Error	±10mm
Falling Plane Error	<1°
Rate Voltage	415V, 50Hz
Rate Power	2kW
Dimension	1700 x 1200 x 2300mm
Weight	Approx. 300kg
